

Table of Contents

1	Introduction	7
1.1	Background	7
1.2	Overview	10
1.3	Scope and Purpose	10
1.4	Benefits	11
1.5	Objectives	11
1.6	Rationale for the Second Edition	11
1.7	Key Terms and Concepts	11
2	Regulatory and Guidance	13
2.1	Introduction	13
2.2	Compendial Water System	14
2.3	Pure Steam	20
2.4	Compressed Gases	23
3	Sampling for Process Control Versus Quality Control.....	27
3.1	Introduction	27
3.2	Definitions	27
3.3	Process Control and Quality Control Considerations in a Monitoring Program	28
4	Risk-Based Sampling	33
4.1	Introduction	33
4.2	Risks Associated with the Sampling Process	37
4.3	The Negative Impact of Incorrect Data	43
5	General Sampling Requirements	45
5.1	Introduction	45
5.2	Sampling	48
5.3	Sampling Frequency	51
5.4	Sample Collection and Testing.....	54
5.5	Sample Storage	59
6	Pharmaceutical Water	63
6.1	Introduction	63
6.2	Determining Sampling Locations	66
6.3	Developing Sampling Plans	70
6.4	Sample Valve Design	83
6.5	Sampling Techniques	86
6.6	Sample Handling and Transport	88
6.7	Microbial Attribute Testing	89
6.8	Parametric (Real-Time) Release	92
7	Pure Steam	97
7.1	Introduction	97
7.2	Requirements.....	97
7.3	Critical Quality Attributes.....	97
7.4	Sampling Plans	102
7.5	Commissioning and Qualification.....	103
7.6	Sample Valve Design	108
7.7	Sampling Techniques.....	108
7.8	Feedwater Impact on Sampling	112

8	Process Gases	115
8.1	Introduction	115
8.2	Sampling Locations.....	116
8.3	Sampling Plan (Tests Performed, Frequency, and Duration).....	121
8.4	Sample Valve Selection	124
8.5	Sample Collection and Analysis for Compressed Air and Process Gases.....	126
8.6	In-Line, Online, and At-Line Versus Offline Testing and Analysis	129
8.7	Sample Handling.....	130
8.8	System Monitoring and Trending	130
8.9	Sample Plan Examples.....	130
9	Appendix 1 – Appropriate Microbial Testing of Samples	131
9.1	Impact of Compendial Microbial Test Method Precedence.....	131
9.2	Considering Alternative Microbial Test Methods – Enumeration Temperatures and Growth Media	132
9.3	Alternative Microbial Test Methods Protocol Elements.....	132
9.4	Justification for Alternative Microbial Test Methods	132
10	Appendix 2 – Examples of Water System Sampling Point Locations	133
11	Appendix 3 – Qualifying In-Line Conductivity and At-Line TOC Instruments for Real-Time Release in Pharmaceutical Water Systems.....	135
11.1	Contamination of Samples Collected for Conductivity Measurement.....	136
11.2	Contamination of Samples Collected for TOC Measurement.....	137
11.3	Qualifying In-Line, Online, or At-Line Instruments	137
11.4	Minimizing the Differences between Instrument and Laboratory Results	138
11.5	Benefits of Real-Time Release Versus Offline Analysis.....	138
12	Appendix 4 – References	139
13	Appendix 5 – Glossary	143
13.1	Acronyms and Abbreviations	143
13.2	Definitions	145
